** PEACOCK SPRINGS ACQUISITION **

** BOARD NOTES **

The Cave Diving Section thru the NSS, is in official contact with the Nature Conservancy regarding the potential purchase of the Peacock Springs property from Bob Wray of Ginnie Springs and his partners.

Steve Ormeroid, Section Chairman, has been given official Task Force status from NSS to pursue this matter on behalf of NSS and the Section. This matter is progressing much faster than originally anticipated, so we hope for a successful outcome that will both provide for the long-term protection of this very unique site and also preserve access to the site that more than any other could be called the birthplace of Cave Diving.

Steve is anxious to receive comments from any member of the cave diving community (Pro or Con) on the acquisition and/or management of Peacock Springs site, however the submission of comments MUST BE DONE ASAP so that he can best represent us in his efforts on our behalf. Timeliness is critical in this matter!

The Board of Directors of the NSS-CDS met on October 9, 1983 in conjunction with the TAG Fall Cave-In. It was decided that any funds donated to the Section as a result of recovery efforts would be earmarked for recovery training programs. This is due to our receiving an unsolicited contribution which we wanted to use in the best manner possible.

Concerning Lucayan Caverns, it was felt that statements had already been forwarded to the Bahamas National Trust by Rane Curl and Bob Stitt of the NSS board, and that these statements properly reflected our concern for this delicate environment and that some protection of the environs was called for.

It was also agreed that each workshop chairperson had the authority to develop their own budget to be approved by the Board. This was simply a housekeeping item.

We will continue our efforts to work with the National Certification Agencies to have a positive impact on their efforts to reduce the drowning of open water divers in caves.

The response was unanimous in regard to our decision to publish maps once again. These maps will soon be available from the publications committee. We will follow NSS guidelines in that the cartographer has the ultimate right to determine whether or not a map is published. Specific locations will not be revealed in the map legends to avoid locations becoming known to those individuals that ought not enter these sites.

More on the subject of the Peacock Springs acquisition is in another article in this issue.
